Bilateral Meetings

- Tuesday 15:00 - 18:00

Description

Informatika d.d. is a cloud-services provider, including integrated end-to-end support. Therefore, customers can fully concentrate on the automation and optimisation of their business processes, leaving us the challenges regarding IT solutions and infrastructure. Informatika d.d. is a leading provider of IT support and services to electric power distribution companies, as well as to some affiliated companies in Slovenia. There are more than 1,500 end-users, using our solutions. Efficient solutions for mass-printing and automated enveloping are also available to our customers.

Offer & Request

Solutions for electric power grid services providers

Our solutions for electric power grid services providers are designed in a way, to ensure complete end-to-end support, combining efficiency, flexibility, and process automation. The whole process chain is integrated, starting by obtaining core-data (users contracts, power metering), up to the final result: the invoice for the end-customer is in paper or e-form.
