Bilateral Meetings

- Tuesday 15:00 - 18:00

Description

Labtim is offering full spectra of customized solutions to our customers, combining strong local service support with application support and experienced sales experts. Our focus is in long term fruitful cooperation, where we exchange our knowledge.

Field of work is thermal analysis and static mechanical testing that can be applied for any material from wood, plastics, metal, composites, semi and final products etc.

Organization Type

Company

Areas of Activities

Industrial manufacturing and processing

Offer

Measuring equipment for thermal analysis and mechanical testing

Material testing and characterization are becoming more and more important in everyday's search for new cutting-edge material properties.

We are a distributor for TA instruments, Tinius Olsen and Applied Test systems.

TA Instruments offer unique solutions for all sorts of thermal analysis and characterization. Thermal Analysis is important to a wide variety of industries, including polymers, composites, pharmaceuticals, foods, petroleum, inorganic and organic chemicals, and many others.

Tinius Olsen offers solutions for static mechanical testing with tensile compression machines, Charpy testers, Rockwell, Brinell and Rockwell hardness testers, torsion testers polymer testers etc. They are a manufacturer with longest tradition in the world with more than 140 years of experience.

Applied Test Systems specialize in manufacturing ovens by customers needs (shapes and dimensions, heating zones and ranges, types of usage). They are also a leading manufacturer when it comes to stress rupture and creep machines.
