Bilateral Meetings

- Tuesday 15:00 - 18:00

Description

The company is engaged in the development of complex web and mobile applications, mainly based on open source technologies. We have established a very disciplined and responsible business model that has been recognized by customers around the world, so we managed to achieve successful long-term cooperation with many companies from the United States, Canada, Sweden, Norway, Austria, Netherlands, and many other countries worldwide. Over 90% of our business is transacted abroad, and also we opened our offices at Halmstad-Sweden and Chicago-USA. The company employs more than 20 people at the moment. Find out more by visiting our website www.dvcsolutions.com

Organization Type

Company

Areas of Activities

ICT and telecommunications

Intellectual services (engineering, design, consulting)

Offer

Software development services

We offer following services to our clients:

- Development and maintenance of complex web and mobile software
- Simple website design, development and maintenance
- Web services and mobile applications (Android & iOS)
- UI/UX, graphic design

DVC Solutions covers the entire process of web or mobile development, which means that we have the capacity for executing total projects in this area, i.e. to provide following roles in this process:

1. Project manager
2. Business analyst
3. System/software architect
4. UI/UX designer
5. Graphic designer
6. Frontend developer
7. Backend developer
8. Mobile developer (Android and iOS)
9. Quality assurance expert
10. Business developer
11. Support/maintenance expert

It is important to note that we can cover a large number of (mostly) open-source web and mobile technologies and programming languages using our knowledge and expertise, that are named as following:

- PHP (Composer, Symphony, Laravel, Zend, Zend2, CodeIgniter, CakePHP)
- HTML5, CSS3
- JavaScript (jQuery), AngularJS
- Native Android and iOS
- Java
- CMS tools (WordPress, PrestaShop, WooCommerce)
- Web services (API, SOAP, JSON, XML, REST)
- Automation (Vagrant, Docker, GIT)
- Web services (Apache, NGINX)

Keywords: software development mobile development web development android ios php website web services API outsourcing html css java backend frontend
